English

Objective

I am a highly driven student who strives to cultivate my strengths and make the best use of them in my pursuit of gaining more knowledge.

Education

BDU STEM Incubation Center *2018-2022*
High-school Diploma
89.92/100

Bahor Dar University *2023-2028*
Bachelor

Work Experience

Bit Career Development Center *2024 -*
Web developer
Developed, enhanced, and maintained company websites, ensuring optimal functionality and performance. Fixed bugs and resolved technical issues related to front-end and back-end programming. Implemented improvements to boost user experience and site efficiency.

CodeAlpha *2024 - 2025*
Backend Developer
Designed, developed, and optimized scalable backend systems and APIs to support web applications. Troubleshot and resolved server-side issues, ensuring high performance and reliability. Collaborated with frontend teams to integrate user-facing elements with server logic. Implemented database solutions and security best practices to enhance data integrity and system efficiency.

Projects

Ahadu Amharic Dictionary
It is a software that runs through the platforms of mobile, desktop and over internet. It enables the digitalizing of the Amharic dictionary book. It has a Multilanguage feature.

STEM Center Student Record Management
It is a desktop application developed with C#. It allows the registration of new students, and keep their academics records and their full formation.

Amazon clone
Developed a responsive Amazon-inspired e-commerce website tailored for Ethiopia, featuring localized product listings, a user-friendly shopping cart, and dynamic search functionality. Built with HTML5, CSS3, and JavaScript, the project highlights my front-end skills in creating intuitive interfaces and adapting global designs to regional needs.

LiveScribe online editor

Built a real-time web editor (like CodePen) where users can write HTML, CSS, and JavaScript code with instant output preview. Developed using HTML5, CSS3, and JavaScript, it features syntax highlighting and a responsive design, showcasing my ability to create practical coding tools. Perfect for quick prototyping and front-end practice.

Damena – Bilingual Weather App for Ethiopia

A responsive app that shows real-time weather and 5-day forecasts for Ethiopian cities in both English and Amharic. Features include dynamic visuals, local weather news, and a clean, mobile-friendly UI.
Tech: React.js, Tailwind CSS, OpenWeatherMap API.

🎗 Achievements & Awards

- BDU STEM Center Science Fair Winner
- 7th National Science Fair participant, hosted by Ministry of Education and STEMpower.
- ANRS Science Bureau and Ethiopia National Technology Science fair winner
- 21st century skill and career development
- Solve IT Innovation Competition runner-up
